

Name: _____

Analyzing Double Bar Graphs

The double bar graph below shows the number of minutes of video games played by students on Friday and Saturday.

Minutes of Video Games Played

- 1.) How many total minutes did Isaiah spend gaming on Friday? _____
- 2.) What was the least number of minutes spent gaming in one day? _____
- 3.) Which student spent the highest total minutes gaming? _____
- 4.) How many total minutes did Chester spend gaming? _____
- 5.) How many more total minutes were played by Anthony over Rihanna? _____
- 6.) How many more combined minutes played did Kelley and Chester have over Rihanna and Isaiah? _____
- 7.) Every student except for Isaiah spent more time gaming on Saturday than on Friday. Give one possible explanation why Isaiah's playing time decreased, while everyone else's increased.

ANSWER KEY

- 1.) How many total minutes did Isaiah spend gaming on Friday? **36**
- 2.) What was the least number of minutes spent gaming in one day? **8**
- 3.) Which student spent the highest total minutes gaming? **Anthony**
- 4.) How many total minutes did Chester spend gaming? **64**
- 5.) How many more total minutes were played by Anthony over Rihanna? **32**
- 6.) How many more combined minutes played did Kelley and Chester have over Rihanna and Isaiah? **16**
- 7.) Every student except for Isaiah spent more time gaming on Saturday than on Friday. Give one possible explanation why Isaiah's playing time decreased, while everyone else's increased.

Isaiah's gaming time may have decreased on Saturday because he plays a sport and has to attend practice while everyone else is off of school and has free time to game.
